

Brian Riviere

L2/L3 Infrastructure & Security Consultant

Microsoft Cloud | Identity | Network
+352 20 3333 2045 | briviere@mixvoip.com

PROFILE

L2/L3 infrastructure and security consultant with hands-on experience across Microsoft identity, endpoint security, network/firewall modernization, virtualization, cloud infrastructure and operational tooling. Experienced in audit and pentest remediation, privilege reduction, GPO/baseline standardization, Conditional Access, Intune/Defender rollout, patching and post-compromise hardening.

TECHNICAL FOCUS

Identity & access AD DS, Entra ID, JIT privilege, MFA, Conditional Access, Global Secure Access, GPO.	Endpoint & exposure Intune, Autopilot, Defender, compliance/security policies, vulnerability management, patching.	Operations L2/L3 Audit remediation, scripting, runbooks, SOC/CISO coordination, incident recovery, customer ownership.
---	--	--

CORE SKILLS

Microsoft & identity	Active Directory, Entra ID, Microsoft 365, Intune/Endpoint, Defender, Azure administration and architecture.
Hardening & security	GPO/baselines, least privilege, JIT access, MFA/Conditional Access, ZTNA, vulnerability management.
Infrastructure	Windows Server, NPS, PKI, VMware, Proxmox, Azure Virtual Desktop, Bicep/Terraform, Veeam Cloud Connect.
Network & security	Sophos, Fortinet, centralized switching, WAF, site-to-site Azure tunnels, Wazuh SIEM, Zabbix monitoring.
Automation & tooling	PowerShell, Intune Remediations, RMM scripting, GLPI custom development, AI-assisted ticket workflows.

CERTIFICATIONS

Certification	Validity	Link / ID
Microsoft Certified: Azure Solutions Architect Expert	June 2025 - June 2027	Verify C36F40C684D2AF56
Sophos Certified Engineer	Nov. 2024 - Nov. 2026	Sophos certificate
Microsoft 365 Certified: Endpoint Administrator Associate	June 2024 - June 2027	Verify DC3DA3EA3512621E
Microsoft Certified: Azure Administrator Associate	May 2024 - May 2027	Verify 5D068B08B6EB90AB

PROFESSIONAL EXPERIENCE

L2/L3 IT Consultant - Infrastructure & Security | Mixvoip SA

July 2020 - present | Steinsel, Luxembourg

Ownership of complex customer environments and internal infrastructure initiatives, covering Microsoft identity, endpoint management, security operations, network/firewall architecture, virtualization, backup, monitoring and automation.

- Managed a strategic customer environment with annual audits, pentest finding remediation, infrastructure operations, application/OS security patching and migration of the customer site into a VMware datacenter.
- Implemented Microsoft security controls: Conditional Access, Global Secure Access for ZTNA, Just-in-Time privileges for on-premises access and cloud roles, Intune, Defender, automatic device enrollment, compliance/security policies and Intune application deployment.
- Operated Defender for Cloud Apps and Defender Vulnerability Management, Azure Update Manager, Endpoint Central and ServiceDesk Plus; coordinated remediation with SOC and CISO stakeholders.
- Migrated large multi-site network infrastructure to centralized multi-site management with Sophos firewalls; managed Fortinet firewalls, centralized switching and centralized WAF for sensitive services.
- Designed and deployed Azure infrastructure with tunnels to customer sites, Azure Virtual Desktop environments and automated Azure deployments using Bicep and Terraform.
- Maintained Windows infrastructure components including Active Directory, NPS and PKI; performed infrastructure analysis and post-compromise signal review to recommend containment and hardening measures.
- Delivered emergency restores in Mixvoip datacenters for customers affected by disasters and maintained Veeam Cloud Connect services.
- Built and maintained monitoring/security platforms: Wazuh SIEM for Mixvoip, Zabbix servers, Zabbix proxy networks and centralized network monitoring.
- Migrated internal Mixvoip virtualization infrastructure from VMware to Proxmox and contributed to broader infrastructure modernization.

- Managed workstations and scripting through RMM tooling; created custom Intune Remediation scripts for installation, configuration and patching tasks.
- Developed custom GLPI modules for Entra ID application traceability/audit, Entra user management, license synchronization, contract management and AI-assisted ticket drafting/handling.
- Deployed a full customer workstation fleet managed through Intune Autopilot with Entra ID joined devices.

EARLIER EXPERIENCE

Developer / Application Infrastructure | Mixvoip SA

May 2019 - August 2020 | Steinsel, Luxembourg

- Developed and maintained web projects and internal tools, including signatures and application components.
- Built dedicated infrastructure based on Docker; migrated and maintained legacy infrastructure.
- Delivered corrective and evolutionary maintenance for existing projects.

Web Developer | Piranha et Petits Poissons Rouges

Sept. 2018 - Apr. 2019 | Strassen, Luxembourg

- Web development and application maintenance in a project delivery context.
- Contributed to deliveries, fixes and functional enhancements.

IT Technician | Baxter International Inc.

Feb. 2017 - Apr. 2017 | Lessines, Belgium

- Provided L1 support to end users.
- Participated in a thin client deployment project.
- Prepared equipment, provided on-site assistance and resolved proximity support incidents.

EDUCATION & LANGUAGES

Education	CESS / High School Diploma - Institut Technique Libre, 2017.
Languages	French: native. English: professional working proficiency.
